I Famoco : a game changer in...

Facility Management

How to reduce operational costs and eliminate paper processes?

Workers in the field are equipped with Famoco devices (GDPR compliant) to remotely manage schedules, receive real time notifications, give proof of presence and collect data securely & efficiently.

Branchless Banking

How to extend reach in remote areas profitably?

Famoco provides a secure and mobile solution for agent banking to meet all types of consumer banking needs including micro-financing.

Cashless Payment

How to facilitate Chinese tourists' purchases in France ?

Famoco provides merchants with a standalone mPoS to accept Alipay payments in France with the same user experience as in China.

Smart Cities & Transportation

How to combine multiple services into one card seamlessly?

Cities equip the points of access and payment for their public services with Famoco devices. Multi-service city cards are used to access transportation, libraries and leisure facilities.

Famoco Solution

AN ALL-IN-ONE SOLUTION FOR MOBILE DEVICE DEPLOYMENTS

1. Mobile Device Management

2. B2B OS (by Famoco)

3. Full range of corporate-owned devices

I Our Solution

The Famoco Suite is made up of 3 components; a Mobile Device Management (MDM) platform, the B2B OS and a range of secure Android devices.

The Famoco Suite has been designed to meet business needs. The MDM platform manages devices remotely and integrates a private App store from which applications can be deployed in kiosk mode. The B2B OS is a custom Android OS with enhanced security features and runs on all Famoco devices.

Famoco devices address a wide range of requirements and come in multiple form-factors : Pocket-sized, large screen, 1D/2D imager, ruggedized, integrated printer, tablet, mounted validator. All devices are secured by the B2B OS, and the FX Series devices have embedded hardware security.

It is a turnkey solution for large scale deployments with zero-touch set-up. Administrators have real-time visibility and control over fleets which they can easily scale to meet growing needs.

I Security at every level of the Famoco Suite
